Online Safety

How can I enjoy using the internet and keep safe?

Keep your personal information safe!

If you wouldn't say it to a stranger on the street, don't share it with strangers on the internet...

Don't forget to check your privacy settings!

Online games and social media can be a great place for chatting to your friends. Always know who you are talking to. If an adult who you don't know ever asks you to meet up, say no and report it...

Think before you accept something from someone online e.g. a file, a download, a picture etc. It may contain a virus. If you don't know who it's from, and it has an attachment... DELETE IT!

Not everyone online is trustworthy. Somebody may be lying about their age and who they are. Make sure you know who you are talking to and use reputable sites and services to protect you and your computer.

Tell a parent, carer or trusted adult if someone, or something makes you feel worried or uncomfortable online. Also, tell someone if a friend of yours needs help online too.

Think before you post

Think before you post

What you post online can:

- Be misinterpreted
- Upset someone
- Attract unwanted attention
- Get you into trouble

Think before you post

Cyberbullying is a "method" of bullying, rather than a "type" of bullying.

It includes bullying via

- Text message
- Instant messenger services
- Social network sites
- Email
- Images or videos

How would you CLIKE it?
